

UNIFIED COMMUNICATIONS

WORK SMARTER

The ability to work smarter by unifying your company's communications is now achievable with a custom solution from the professionals at ATC and GBS.

An on-premise, cloud-based or hybrid solution from Mitel will bring together multiple forms of communications like voice, video, data services, and software applications into a single environment - improving business processes and your company's efficiency.

In today's hyper-connected world, your ability to quickly communicate with the right people, access data, and exchange information can make the difference in business success or failure.

Unified Communications and Collaboration include:

- Instant Messaging
- Find Me, Follow Me - forwards calls to a designated list of numbers, so you never miss a call
- Unified Messaging - the ability to retrieve all your messages from one central location
- Video Conferencing - via PC and mobile device
- Mobile Applications - extending unified communications and collaboration to smartphones and tablet
- Teamwork Applications - manage group projects with seamless information sharing
